

NKS – Fukushima Seminar

Stockholm, January 2013

Michael Boesgaard Brøndel

Head of Division

Danish Emergency Management Agency

Nuclear Division

Nuclear accidents do happen!

Nuclear accidents will likely have
widespread consequences
- for all of us

Robustness

An accident in the Nordic Region will likely cause strain and place burdens on all authorities.

- but we should not be strained or overwhelmed by the burden, we should be prepared.

Peer review

Binding peer review is not necessarily just another administrative burden – it can be a fruitful and beneficial way of close cooperation

Denmark supports binding peer reviews

- be open to a critical view

Transparency

Transparency promotes trust and confidence!

If transparency is inconvenient the problem is probably not the transparency itself...

Sharing of knowledge

Non-nuclear countries depends on sharing of knowledge – we have no other options

Share your knowledge

– it is free, yet worth a lot!

Assistance and cooperation

A long tradition of cooperation should continue

- and be developed

The Nordic Dimension

It is real – it is valuable

Thank you for your attention!
