<http://www.service.gf.gu.se/konferensverksamhet/konfwall/>  
Tram line 7 stops at  
Medicinaregatan near the  
Centre.

Social dinner will be enjoyed  
at the end of the first day.

The NKS sponsored activity PIANOLIB has been evaluating the quality status of whole body counting in the Nordic countries by means of a proficiency test. The workshop is the opportunity to review and discuss the results of the intercomparison and also exchange experiences in the field. Some of the topics already confirmed are listed below. A detailed program will be circulated in due time.

### Invited speakers

#### Rodolfo Cruz Suárez

Radiation Protection of Workers  
and Monitoring Unit,  
International Atomic  
Energy Agency, IAEA.  
(Confirmed)

#### Didier Franck

Institut de Radioprotection et  
de Sureté Nucleaire, IRSN,  
France

### Presentations

Results of the PIANOLIB proficiency  
test

Whole body counting at hospitals

Resources for whole body  
counting measurements and  
internal dosimetry assessment in  
the Nordic region

Internal contamination accident  
at Ringhals NPP

Internal dosimetry associated with  
numerical phantoms.

State of the art for individual  
internal monitoring of Ionizing  
Radiation

In addition, the brand new **Nordic phantom library** website will be  
boldly introduced.

Also, information on jointly acquisition of new phantoms will be  
presented and of course

### Open discussions
